

Rolling TV stand

Clean perspective CAD render. Flat material colors are schematic: no imagined OSB texture, stain, tile skin or completed physical-build photograph.

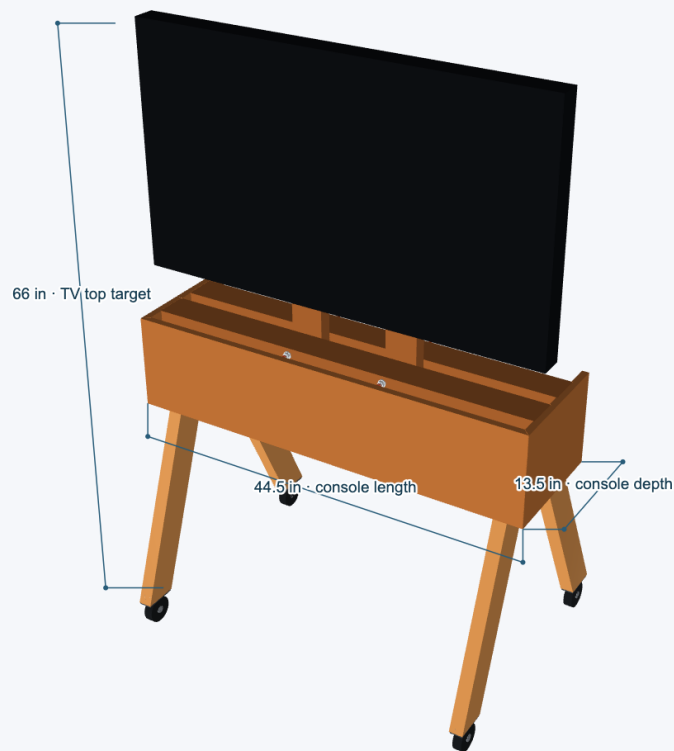

Dimensions, hardware and construction remain a design study subject to the holds in the reproduced guide.

Assembly relationships

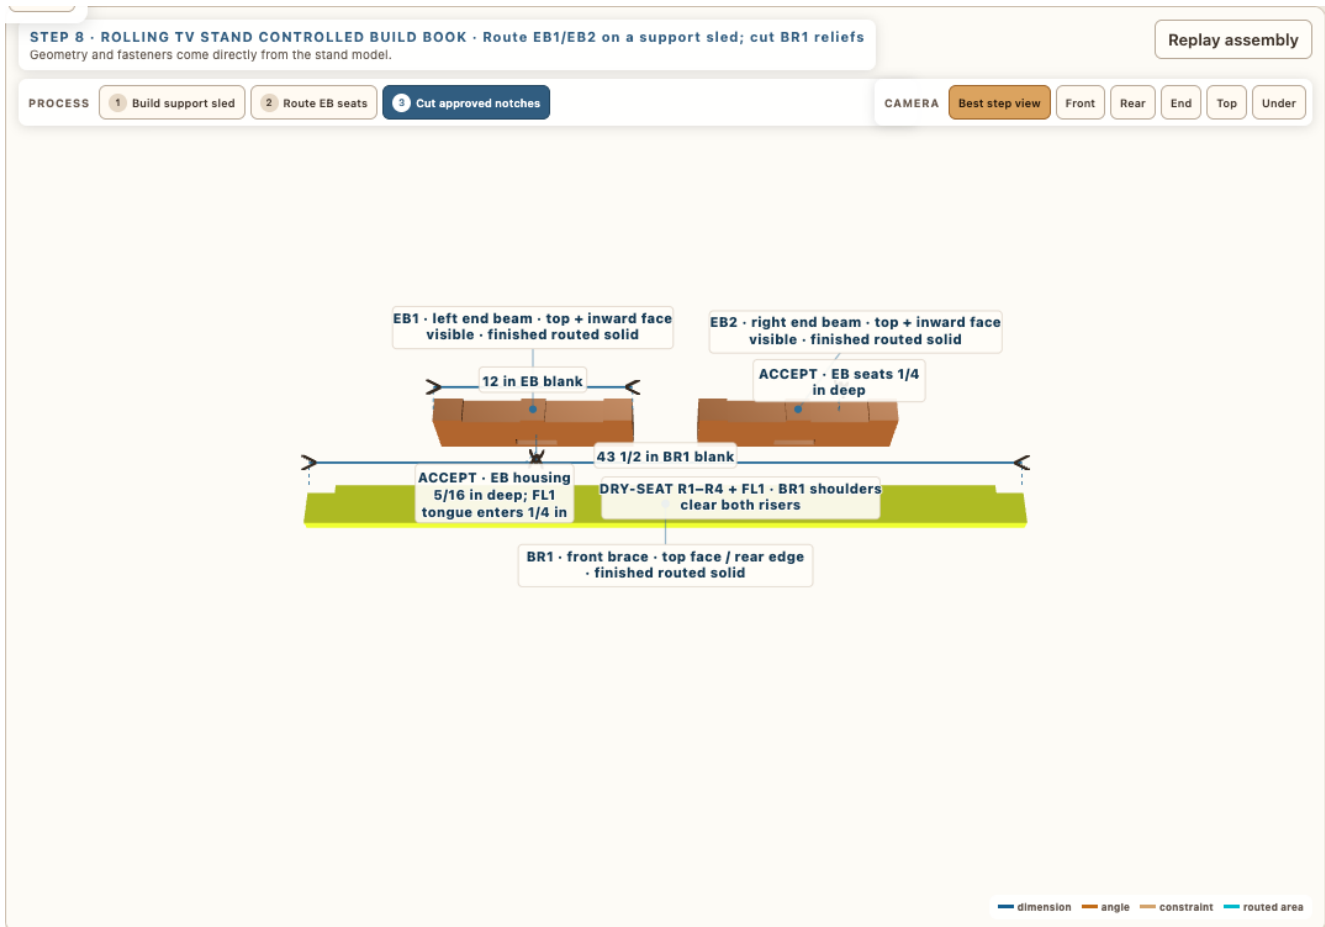

Presentation explosion of unchanged solids, not a fastening sequence. Coffee table: wood components separated; hardware omitted. TV stand: shell faces separated from chassis, upright group raised 9 inches, TV/mount group raised 20 inches and moved forward 10 inches. These display offsets are not construction dimensions.

Overall dimensions

Dimensions are attached to actual model-space endpoints. TV stand dimensions distinguish the console body from wheelbase. Coffee table wheel clearance assumes the provisional 4-inch caster height.

Construction detail

Original CAD guide stage; use the full guide for dimensions, tool setup and unresolved checks. Colored parts and hardware aid identification, not material or finish selection.
